

Action NitroPanel®

PORTABLE SPORTS FLOOR SYSTEMS

THE UNIVERSITY OF BRITISH COLUMBIA

University of British Columbia Thunderbird Sports Centre, Vancouver, British Columbia, Canada

The NitroPanel® systems are high-quality, durable sports floors that deliver great performance characteristics. Their unique, interlocking panel system makes assembly and breakdown quick and easy. FIBA-certified, these systems meet or exceed requirements for amateur, international and professional applications.

ACTION NITROPANEL® PORTABLE SPORTS FLOOR SYSTEMS

Simply beautiful!
Innovation and
evolution of portable
sports floor systems.

Performance, portability and aesthetics join together perfectly in a portable hardwood sports floor designed for easy, sure-fit set-up — and great playability. With design innovations, premium materials and manufacturing excellence, Action delivers a portable floor system that's a real game-changer.

The NitroPanel Portable Floor Systems feature a stunningly beautiful surface deck of MFMA grade-marked Action LL (long length) northern hard maple sections. Each panel is fabricated to exacting specifications for fit and appearance.

The NitroPanel features Expansion Ridge Technology (ERT) that accommodates expansion incrementally, board to board for aesthetic uniformity.

Beauty below the surface.

The NitroPanel subfloor system is supported by stringers of premium laminated veneer lumber (LVL) — stronger and straighter, and without the twists or bows common to SPF (softwood lumber). The subfloor deck boasts the superior strength and stability of 15/32" thick, APA rated span rating of 32/16 — exposure 1 HPS all hardwood surfaced sheathing.

Laser-cut, precision-formed assembly brackets ensure perfect-fit assembly.

Concealed steel assembly brackets, laser-cut and precision-formed, along with a continuous perimeter integral tongue-and-groove system ensure exact panel alignment. Specially engineered tapered steel assembly pins secure panels together and are easy to install and remove.

The NitroPanel FC performance option delivers unmatched playability, uniformity, shock absorption, and design integrity.

Built-in benefit for installers.

The NitroPanel systems feature the industry's lowest panel weight per square foot, which lowers installer fatigue for safer assembly and disassembly.
